Filter Tips

► DESCRIPTION

HiComp's tip line is the ideal choice for a universal pipette tip or universal filtered pipette tip. The pipette tips are manufactured under stringent ISO13485:2016 and ISO9001:2015 quality control guidelines in state-of-the-art Class 100,000 cleanroom environments. The surface and material of our tips utilize special processes and polypropylene resins to ensure the low retention qualities for ensuring they are one of the most accurate pipette tips in the market.

PCR 8-strip Tubes

► DESCRIPTION

PCR tubes are constructed from medical-grade polypropylene (PP), known for its exceptional chemical stability and thin walls that allow for rapid temperature transfer. These tubes are also transparent, making it effortless to observe samples, and are specifically designed for use in RT-PCR and qPCR. Additionally, the 8-strip tubes offer a convenient format for high-throughput applications.
